2017	“Battle of the Artists” competition, Moscow

SHORT CREATIVE BIOGRAPHY

I am an architect of small worlds. I combine drawing and IT: in painting I look for an image, in working with data and automation I build systems, and in both cases the same thing occupies me: how to assemble a lasting form out of meaning and inspiration.

I was born and live in Moscow. I began to draw at the art studio “Planet of the Young” under A. A. Soloviev (member of the USSR Union of Artists since 1985): the “artistic and graphic drawing” program, 2005.

Main materials: canvas, paper, oil and watercolor. Techniques: alla prima, impasto, traditional, and a palette knife in some works. Directions I work in: symbolism, expressionism, impressionism and abstraction. I keep looking for new forms and adding something new to my work.

I am still learning. In 2025 I took the courses “Academic Drawing” and “History of Fine Art” (Pentaskul), art therapy (NIIDOPO), and the basics of Adobe Photoshop (Netology). In 2026 I added professional retraining as a teacher of fine art and technical drawing, the program “Management in Culture and Art”, the course “Copyright for Designers” (NARKHSI) and a mini-course on design and neural networks (Formfactor).

Since 2017 I have taken part in competitions and exhibitions in Moscow and online: from the “Battle of the Artists” competition to solo exhibitions in 2021 and international online projects (the exhibitions are listed separately). I am developing the Kradle Workshop project: small worlds, symbols and warm objects.
